Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-7, and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Araya (4,094,515).

Araya discloses a seal for an endless track wherein the seal has a symmetrical cross-section along a centerline that is parallel to an axis (centerline and axis would both be vertical in Fig. 6). The cross-section of the seal is an X-shape. The seal is capable of being mounted between a bushing and bottom surface of a link, where in the bushing side legs (e.g. 21 and 22) extend outwardly away from one another and the other side legs (e.g. 23 and 24) extend outwardly away from one another. As best understood, the portion near line 20 is an embedding portion in a space between the legs 21-24. The seal includes an elastomer.

Allowable Subject Matter

3. Claims 2, 3, and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art or record taken as a whole does not show nor suggest the combination of limitations

required by the claims. Utz, Araya, and Thuerman show an X-shaped seal for an endless track. Benoit, Horvereid, and D'Assignies show seals that can be considered X-shaped and could be used in an endless track. The seals have a protrusion extending from an intersection of legs. Horvereid's, however, does not extend farther than a plane connecting the end portions of the legs. Also, even if Benoit or D'Assignies were used in a track or used to modify an X-shaped track seal (i.e. such as Araya) there is no motivation to provide the protrusion on the side facing the bushing as required by the claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
